PROFESSIONAL SUMMARY

Full Stack Developer skilled in building scalable, AI-powered web applications with React.js, Node.js, Express.js, and MongoDB/MySQL. Experienced in designing REST APIs, integrating AI into production-style workflows, and applying strong DSA fundamentals to solve real-world problems, with a continuous drive to learn modern web technologies.

TECHNICAL SKILLS

Languages	C, C++, Java, JavaScript, VB.NET
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js
Databases	MongoDB, MySQL
Tools & Platforms	Git, GitHub, n8n, Postman, REST APIs
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming, Responsive Web Design

EDUCATION

Bachelor's of Computer Application — Dezyne École College | Expected Graduation 2027

Senior Secondary Education (12th Class) — St. Paul's School, Ajmer | Percentage: 85%

Secondary Education (10th Class) — St. Paul's School, Ajmer | Percentage: 87.6%

PROJECTS

Interview AI Platform

Architected a full-stack AI-powered mock interview platform simulating realistic, one-on-one interview experiences for job seekers.

- Built an interactive AI interviewer with real-time voice conversation and a lip-synced AI avatar for a natural, human-like interaction.
- Engineered resume-based interview generation, dynamically creating role-specific questions across multiple interview categories.
- Delivered personalized, AI-generated feedback reports to help candidates identify strengths and areas for improvement.
- Implemented secure authentication and a personalized dashboard, backed by a responsive React.js UI and a secure Node.js/Express.js REST API.

Tech Stack: *React.js, Node.js, Express.js, MongoDB, REST APIs, AI/Voice APIs*

GitHub Repository: <https://github.com/srashti0709/InterviewAI.git>

HireMate AI *Intelligent Job Application Assistant*

- Designed and built an AI-powered career assistance platform that automates end-to-end job application workflows.
- Developed autonomous AI agents using n8n to automate resume analysis and personalized cover letter generation.
- Integrated the Google Gemini API to power city-wise job search, tailored skill recommendations, and ATS score analysis.
- Streamlined the job search process by combining workflow automation with AI-driven insights, reducing manual effort for users.

GitHub Repository: <https://github.com/srashti0709/HireMateAi.git>

ATM Management System *C++ & SQL*

- Built a console-based ATM simulation in C++ with secure MySQL database integration for persistent data storage.
- Implemented secure admin and user authentication using account number and PIN verification.
- Developed core banking features including account creation, balance inquiry, cash deposit, withdrawal, and PIN change.
- Applied robust input validation and data security practices to ensure reliable, error-free transaction handling.

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation – Completed a virtual simulation involving data analysis, visualization, and business insight generation using real-world scenarios.
- Tata Group GenAI Powered Data Analytics Job Simulation** – Applied GenAI tools for data analysis, insight generation, and solving business problems through practical case studies.

ACHIEVEMENTS

- 1st Place, Identity Exhibition — Dezyne École, 2024
- 1st Place, Console-Based Project — Dezyne École, 2024
- Runner-Up, Identity Exhibition — Dezyne École, 2025
